

This factsheet gives an overview of FMO's latest figures. For more information, please visit: www.fmo.nl

FMO is the Dutch development bank. We support sustainable private sector growth in developing and emerging markets by investing in ambitious entrepreneurs. We believe a strong private sector leads to economic and social development, empowering people to employ their skills and improve their quality of life.

We specialize in sectors where we believe our contribution can have the highest long-term impact: financial institutions, energy, and agribusiness, food & water. When financing companies and projects in other sectors such as telecoms and infrastructure, we work with a worldwide network of partners with thorough expertise in that area.

Founded in 1970, FMO is a public-private partnership, with 51% of our shares held by the Dutch State, and 49% held by commercial banks, trade unions and other private-sector representatives. FMO has a full banking license from the Dutch Central Bank. FMO has a AAA rating from Fitch Ratings and a AA+ from Standard & Poor's.
